This course surveys Japan’s modern transformation from the Meiji Restoration of 1868 to the present. It examines how political, social, and economic modernization were simultaneous projects while considering their impact on the lives of citizens at home and imperial subjects abroad. We focus on how economic volatility, popular struggles for representative democracy, war, and colonization represent aspects of Japan’s twentieth century experience as well as widely shared dilemmas of modernity.

Students are encouraged to keep in mind the following goals for maximizing learning throughout the semester:

• To look for patterns and themes in history. Students are encouraged to draw connections between major events and ideas in Japan’s modern history and those encountered in other history courses.
• To think about how historians practice their craft. In particular, students will learn to read and interpret a variety of primary sources as a way of understanding the creation of multiple perspectives on the past.
• To understand how history-writing is shaped by contemporary concerns.
• To improve expository writing about historical events; to posit an argument and develop it in a clear and logical progression.
• To polish the verbal articulation of ideas before an audience of one’s peers.
• To gain an appreciation for Japan’s role in today’s world, understanding the relationship between where it has been and where it is headed as a nation.
